Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, it is not clear how the phrase "as well as movement of the forestry machine" further structurally limit the claimed device. Further, it appears in lines 5 and 6 of the claim to be a method step and does not appear to further structurally limit the claimed device.

Regarding claim 5, the examiner is unsure if applicant is claiming the combination of system and forestry felling comprising a felling unit and operating module or the subcombination of the system, only. This in turn, is because while line 1 of the claim appears to indicate that applicant's intention is to claim only the system, other portions of the claims recite limitations which are dependent on the forestry felling (Note claim 5, lines 2-4 and claims 6-8, for example only). In this Office Action, the examiner presumes that the applicant's intention is to prosecute the subcombination of the system, in order that the claims are given their broadest reasonable interpretation. Accordingly, all additional limitations that are dependent on the forestry felling comprising a felling unit and operating module are not considered further structurally limiting with respect to the claimed device.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Neal et al (US Patent 3,972,357), Hill et al (US Patent 5,579,816) or Herlof (WO 87/04128).

The device of Neal et al, Hill et al or Herlof reads on the claimed device including a control system having an operating means (10, 4 or 2, respectively) that is disposed discrete and separate from the forestry machine (26, 6/8/10 and 12 or 20, respectively). It should be noted that a host computer is located in the machine to receive data from the carrying vehicle. Further, the Examiner considers the function recitations of claims 5-8 to be inherent in the device of Neal et al, Hill et al or Herlof.
